laboratory. It only happens when the kinetic energy of the incoming particles is much higher than conventional thermal energies ($\ll 1$ eV). This process can lead, during prolonged ion or plasma bombardment of a material, to ... Wed, 14 Mar 2018 18:26:00 GMT Sputtering - Wikipedia - In 1974, Baddeley and Hitch introduced the multicomponent model of working memory. The theory proposed a model containing three components: the central executive, the phonological loop, and the visuospatial sketchpad with the central executive functioning as a control center of sorts, directing info between the phonological and visuospatial components. Sun, 11 Mar 2018 05:51:00 GMT Working memory - Wikipedia - Reseach Area :
